

Dear Customers,

Due to the ongoing increase in the price of fuel we are reinstating fuel surcharges. As you will recall, we removed them in Dec. 2009 as the average price per gallon of gasoline fell below \$3.00 per gallon. During 2010, the price per gallon in New York fell to a low of \$2.73 in September however it has steadily increased since that time, and in early November crossed the \$3.00 per gallon threshold. As of Feb 21st, the fuel cost is \$3.25 per gallon for New York and \$3.19 per gallon Nationally. The below graph outlines the price for New York Reformulated gasoline over time as reported by the Department of Energy (the web site and statistics are available here:
