

August 10, 2015

The Executive Transportation Group, (ETG) and Vital Transportation (Vital) announce today that Vital will become the newest member of the ETG consortium of companies. Vital's addition will bring the total number of vehicles associated with ETG to over 2000. ETG is a consortium of black car and limousine bases with consolidated services including dispatch, billing, sales marketing and technology. Its purpose is to provide customers with the best service available and its drivers the best opportunity to earn.

Vital is one of the largest and most successful co-op black car company with over 300 vehicles and many of the most highly sought after customers. Vital will now participate with ETG's consortium of companies in sales, marketing and technology as well as outsourcing its dispatch and billing systems. As part of the arrangement, ETG companies will have the opportunity to utilize Vital's Queens facility for driver services. One of the ETG member companies already plans to move its driver service functions to the Vital location. In addition, Berj Haroutunian will become director of consortium relations for ETG in addition to his role as president of Vital.

According to John L. Acierno, president of ETG "The addition of Vital is a milestone for ETG as Vital is one of the most successful co-ops in the black car industry, and its president, Berj Haroutunian is a highly regarded industry leader. He and his management team will give ETG added strength."

Berj Haroutunian commented "Vital has always flourished because it evolves as the industry changes. We see our membership in the ETG consortium as a continuation of this evolution. This is a triple win for our customers, shareholders and drivers."

The integration and combination will occur over the next 45days.
